As we become increasingly enmeshed in a world of computer technology, virtual reality & robots there is a greater
need than ever for understanding the interconnectedness of our common humanity, our relationship to each other
and nonhuman life on the planet. The Exhibit seeks to teach the truth in creating a new common memory of
reparative history and hope, by first telling a story
of injustice from slavery to genocide of indigenous peoples - that robbed us of the best of our heritage
It transforms and ushers in a New American Story for All People!
It will engage & inspire you in "*Making A Difference*" as it takes you "Around the World" on
A Journey of Hope & Discovery

*The "Ancient Wisdom Dance" created by the late Nick Hockings, was performed in December 1999
